Autoclaved Aerated Concrete (AAC)

Lightweight pre-cast concrete blocks, panels and lintels provide structure, thermal insulation, sound proofing and fire protection.

Reap the Benefits

- Energy efficient
- Fire resistant
- Durable
- Strong
- Lightweight
- Workable
- Dimensionally accurate
- Sound absorbent
- Environmentally friendly

SafeCrete AAC products include:

- 4-12" thick standard block sizes
- Pre-cored blocks for vertical reinforcing
- U-blocks for horizontal reinforcing
- 3-12" thick 24" x 48" mini-panels
- Steel reinforced lintels in multiple sizes
- Steel reinforced wall panels to 20' in length
- Steel reinforced floor & roof panels to 20' in length

completion

Hilton Trade & Convention Center Austin, Texas

AAC is the smartest, safest and most satisfying system.

Smart

Costco Atlanta, Georgia

This retail chain realized an average savings of \$80,000 in construction costs and an average savings of \$60,000 per year in HVAC costs over their conventionally built stores.

Safe

SafeCrete solid masonry buildings have withstood hurricanes, earthquakes, tornadoes and fires in every region of the world. The U.S. government is now using AAC to build more secure military bases.

Fort Benning Garrison

Satisfying

SafeCrete offers superior sound insulation and design flexibility. Deep set windows, arches, turrets and exotic trim complete the look for this chain of Mexican restaurants.
